Satisfied	87.5%	7
Dissatisfied	12.5%	1
		Totals: 8

13. Please share any comments about your experience at this clinical site.

ResponseID Response

14 I loved my clinical experience at Hillsborough. The experience was extremely helpful in learning the material and care necessary for NURS125 and aided growth throughout the semester.

17 I felt like most of the staff was bothered by us being there, minus a few who were actually helpful and eager to teach us

ResponseID Response

2 Both places were really fun to be at!

3 I thoroughly enjoyed my time at NERH specifically at the Salem location. This location provided many great opportunities to help with our learning

4 Northeast Rehab was an amazing learning experience.

Neither Satisfied nor Dissatisfied		33.3%	2
Totals: 6			

6. Please share any comments about your experience of clinical learning online.

ResponseID Response

- 1 At the beginning of online learning the clinical work was overwhelming and overloading. Better as the weeks went on.
- 2 It is very hard to do online work and retain the information at the same time with the amount of work we had to do. It was a great experience, but for some people, sitting in front of a computer screen for 6 hours is hard, but over all it was good, I enjoyed the experience
- 3 I enjoyed the various online sites that were provided that allowed us to experience something new and to keep us interested. I felt that the time allotted was fair in the sense of it is our scheduled clinical hours but at the same time I felt that it wasn't fair due to the fact that I felt as if I was rushing through to get it done on time. I ended up submitting most of my online clinical work late as I wanted to try to learn the material versus just getting it done.
- 4 It was a struggle. Some clinical days seem to have an exceeding amount of work. The case studies were tough but great for clinical experience for critical thinking.
- 5 I understand time management and accountability, but it really hard under the at-home circumstances with the assigned work and in the assigned time frame. I think either having a later post conference or work due by the end of the day would be better. Most of the time, I did not finish the clinical work in the allotted time, and although it counted against me I felt like it hurt my learning. I was rushing to complete assignments and not doing my best or learning as much as I could have. Hopefully this kind of situation will never happen again, but that is my evaluation on this clinical.
- 6 Post conference was not utilized as well as I felt it could have been- the integrating of groups did help with this though.
