## 2. Please note the strengths of the course.

ResponseID	Response
2	good instructors
3	Lectures were excellent and to the point, exams were based off of lectures
4	Knowledgeable professors.
6	Organized, critical thinking
7	The professors were very knowledgeable and helpful.
8	Caring professors
9	Knowledge, passion, and commitment of professors
10	This course has definitely challenged me and pushed me to retain information in ways I have not been able to do before.
11	contents and structure of the course
12	Loved the text book. It was very helpful in understanding concepts.
13	Other than the reading and supported material, I believe the strengths of course our the commitment of the professors to encourage all of us to challenge ourselves then rise to that challenge.

### 3. Please note the weaknesses of the course.

ResponseID	Response
------------	----------

2	tests are too much of the grade
---	---------------------------------

4	Clinical is where we spend most of our time, and we don't get graded on it. We work hard in clinical, and our clinical assignments are not graded.
---	--

6	Multiple end of the semester assignments due at the same time
---	---

7	The exam grades were the grades that mostly counted towards the total grade in the class. There was A LOT of other work the students did that did not count towards the class grade or counted towards very little of it.
---	---

9	I would love more class time
---	------------------------------

10	Some due dates should be more spread out to decrease stress with QI project, Diversity paper and exams. Some of the rubrics for projects were unclear and should be modified for future classes
----	---

11	none
----	------

12	the workload for the timeframe was pretty intense although I'm not sure that there is anything that can be done about that since it is all relevant to the accreditation of the program.
----	--

13	For me, I would like more classroom time.
----	---

4. Please offer any suggestions you may have for improving the course.

**ResponseID    Response**

---

4                    Weigh the exam grades less, and use that weight to grade the clinical assignments.

5                    i wish the clinical assignments and projects counted towards the grade some how.

6                    If the assignments were more spread out at the end of the semester it may not be as stressful when prepping for finals

7                    Make the projects, rationale quizzes, and clinical assignments count towards the overall grade of the class.

9                    It a great course

10                   Find new ways for ATI remediation because I felt as if I was simply copying lists from the modules rather than retaining information.

11                   none

13                   I can't think of anything at this time

## 2. Please note the strengths of the course.

### ResponseID Response

2	It's challenging and geared towards cementing the last of the required nursing knowledge into the student's heads.
3	I feel each professor brought different styles of teaching to the classroom and to clinical's that really helped me to see things in different ways. I value and appreciate everyone's strengths as well as weaknesses, its all part of the human experience for me. We are going into a high profile field, its important to be in touch with your own humanity. I personally need some help with organizing the amount of work we have and have been helped by each one of my professors without judgment.
4	the information presented
5	the instructors were very knowledgeable and truly care about the students
6	The knowledgeable professors and the textbooks.
7	The professors are amazing.

## 3. Please note the weaknesses of the course.

**ResponseID Response**

---

2 Too little time for the amount of material, but it can't be helped.

3 I wish there was more classroom time.

4 i would have liked the pediatrics and OB section to be longer

5 none

6 Doing the ATI remediations. It was a huge waste of my valuable time and did not help me improve my performance for the proctored exams.

7 I believe more interactive teaching should be done in the future.

#### 4. Please offer any suggestions you may have for improving the course.

**ResponseID Response**

2 No program is perfect, and this is no exception. Nothing huge i can think of, just tiny things."

3 I have been elected many times by multiple people to reach out to professors and ask questions, I have no problem with this so maybe that's why my classmates ask me. Maybe some people think the professors are unapproachable, I personally don't feel this way.

7 Professor Beck integrated Pictionary and helpful things in Class. I believe more of this should be done to engage the students.
