

Automotive labs are capped at 15 students per lab, 30 per lecture

Classrooms: H186 seats 30 students

H286 seats 36 students

H 287 seats 40 students

Labs: the main shop is loosely section into 4 areas. Each area has 5 lifts. With 15 students that make for 3 students per lift/ job. Classes can overflow into other area of the shop as needed. Classes that use both the main shop and a room can split the students between those areas.

North West:

Fall AUTO 106 Room 33. We can maintain 2 students per bench. Engines are put in bins under the bench at the end of each class

Fall AUTO 227 Automatic transmissions. This course also uses the room 33 off that section. Which has four transmission mounts for bench work. Tools for this course are in this area of the shop.

Spring AUTO 114

Spring AUTO 228 also uses room 33

North East

Fall AUTO121 is in the North East corner of the shop.

Fall AUTO210 uses the North East area of the shop. These classes do not run at the same time.

Spring AUTO 122 Brakes

Spring AUTO215 Engine Performance II These classes do not run at the same time.

South East

Fall AUTO226 uses room 15 and the bays outside that room in the south east area. 226 and 113 do not run at the same time.

Fall AUTO113 is in Room 16 and the 5 bay outside that room, south east corner

Spring AUTO 221 Heating and A/C also uses room 15

Spring AUTO 115 Electrical also uses room 16

South West area is designated for the Honda program to store vehicles inside and is used as needed.

Any class can overflow into another area as needed.
