

May 13, 2021

To whom it may concern:

Wiggins Airways, located at the Manchester-Boston Regional Airport (MHT) located in Manchester, NH offer our support to Nashua Community College (NCC) to relocate their Aviation Mechanical Technician, also known as the A & P (FAA accredited Airframe and Powerplant) certificate training to a new campus located in the Ammon Center at the Manchester-Boston Regional Airport.

Recognizing the increasing demand for all forms of new job opportunities in aviation, the need for certified aircraft mechanics (A & P) will be an ever-increasing demand. NCC is the only source in New Hampshire for this FAA approved training and certification and the MHT location at the Ammon Center is ideal for current and future expansion.

We encourage the acceptance and approval of the grant submitted by NCC to the Appropriations Subcommittee for FY 2022 THUD, Congressionally Directed Spending. Wiggins Airways is FAA Part 135 Air Carrier supporting vital cargo services to the entire aviation infrastructure of the United States and we are acutely aware of the growing demand of FAA certified Aviation Mechanical Technicians (A&P). Our business is greatly affected by the shortage of qualified aviation technicians.

This NCC program will be instrumental in the adding to the economic recovery for New Hampshire from the severe losses as a result of the COVID 19 pandemic and will become an important contributor to fulfilling the growing demand for qualified workers in the aviation industry.

Sincerely,

Donna Nixon

To whom it may concern:

The following aviation businesses, located at the Manchester-Boston Regional Airport (MHT) located in Manchester, NH offer their individual and collective support to Nashua Community College (NCC) to relocate their Aviation Mechanical Technician, also known at the A & P (FAA accredited Airframe and Powerplant) certificate training to a new campus located in the Ammon Center at the Manchester-Boston Regional Airport.

Recognizing the increasing demand for all forms of new job opportunities in aviation, the need for certified aircraft mechanics (A & P) will be an ever-increasing demand. NCC is the only source in New Hampshire for this FAA approved training and certification and the MHT location at the Ammon Center is ideal for current and future expansion.

We encourage the acceptance and approval of the grant submitted by NCC to the Appropriations Subcommittee for FY 2022 THUD, Congressionally Directed Spending.

Each of the aviation businesses supporting this grant application are integral providers of a variety of aviation services to the entire aviation infrastructure of the United States and we are acutely aware of the growing demand of FAA certified Aviation Mechanical Technicians (A&P).

This NCC program will be instrumental in the adding to the economic recovery for New Hampshire from the severe losses as a result of the COVID 19 pandemic and will become an important contributor to fulfilling the growing demand for qualified workers in the aviation industry.
