Standard 3.1 – Service Information- 7/18/2022

The shop contains seven desktop computers with wired internet access. Our Instructors and Students are able to access service information through our subscriptions to Mitchell Pro Demand, Alldata.

Additionally, there are six laptops with wireless internet access, located in the Honda Engine lab (room 14). These are used primarily to access the Honda interactive network (where Honda stores their service information). Also located in this room is a library of service manuals for the Honda training vehicles that we have here at NCC.

Total number of computers with internet access for student use is 13 for 20 bays.
